

Why You Ordered "Utah-Idaho"

A few people buy foods without concerning themselves as to its quality, purity or economy—nor as to the real conditions under which it is produced.

Most people, however, are particular, and want to know about each article they purchase. They in-

terest themselves enough to be reasonably sure that it will give complete satisfaction.

Utah-Idaho Sugar is ordered by practically every housewife in the intermountain country—because they know it has no superior.

UTAH-IDAHO SUGAR
ABSOLUTELY PURE.

FATHER PETRAKIS SENDS HIS CHRISTMAS GREETING

By M. PETRAKIS, Priest
Of the Greek Orthodox Church of Price For Carbon and Emery Counties.

The purpose of the church is to teach people everywhere the doctrines and principles of christianity. It is the only institution by which the spirit of Jesus Christ comes in touch with the faithful member of christianity, and through this refining influence the church membership lives in a superior morality. The church is the best foundation for every community. Every person who believes in refined community associations must give his assistance to his own church.

The church, for the betterment of human association, uses what is known as religious conduct, leading the member always to live according to the rules of the Testament. It is the guard and guide of its members. Every human being who believes in God feels that his or her conscience impels them to worship, and the most appropriate place for such worship is at the church altar.

To fill this greatest necessity the Hellenes of Carbon and Emery counties, as pious and godly Christians, have built this beautiful church in the city of Price for their own worship and for the performance of their own rites and ceremonies.

It is my duty, as well as my great pleasure, to thank all the citizens of Price for their donations and sincere interest in seeing that the Hellenes of this neighborhood have what they were so much in need of. It is also my pleasure to thank all the Hellenes of the said counties for their donations and efforts to build up their beautiful church.

Finally, I wish to say and advise all the Hellenes of this community that my sincere wish is to see all of them law abiding and desirable citizens, to avoid any act which may bring disgrace upon their Grecian name, and to be thankful always to their great benefactor country—the United States of America.

Best wishes and God's blessing upon all.

GREAT COAL YARDS PLANNED FOR FUTURE

STANDARD COMPANY TO SPEND
TWO HUNDRED THOUSAND.

Finer, Larger and In Every Way Better
and More Modern Than Any
thing West of Chicago—Product of
Carbon County Property to Be Handled
At Less Than Six Cents a Ton.

Salt Lake City is to have the biggest and best equipped wholesale and retail coal yard west of Chicago. It is announced, and the Standard Coal company with mines in Carbon county is to build it. The site is near the Denver and the Grande depot at Zion, and the ground for the immense undertaking has been acquired with the exception of the Greek church property, which is wanted. However, a deal is now practically consummated whereby the Standard will get title to this plot, the purchase price being fixed at twenty-seven thousand dollars. The building is to be raised and the area it occupies will be given over to bins, dumps and the like. This will give the company a space three hundred and thirty feet square. Early in the spring of 1918 the Standard Coal company decided to undertake this huge project, and to that end L. H. Curtis, president, and C. T. Worley, general manager of the company, made an extended tour of the East, visiting every large coal yard west of Pittsburgh, Pa.

Handled For Six Cents.

Among the plants they saw was that of the Consumers' Coal company at Chicago, and it is after this the most modern plant in America for the handling of coal that the Salt Lake City yard will be patterned. Rail lines will be built across the property with spurs leading to its various parts and storage facilities for forty thousand tons of coal will be installed along the upper line of the plot. Here provision will be made to handle all lump coal by the carload. A device is to be installed whereby the car, load and all, is to be taken up bodily and dumped into the bins. It will be the only installation of its kind in any Western yard. The pit, slack and other sizes are to be handled by means of a huge crane and channeled buckets. Where the cost of handling coal of all classes now runs from thirty to fifty cents a ton, the new arrangement will enable the company to do the same work at not to exceed six cents.

Plans Are Far Reaching.

The plan of the company is far reaching. By providing this huge storage capacity, the mines of the company can run to full capacity during the summer months, the tonnage to be stored. This will keep the mines busy and the payrolls going during the period that is usually one of idleness. Then, during the winter months, the company can easily take care of its other markets, when the demand is heavy, without having to worry about the Salt Lake City customers.

"If there can be given all of Utah public utilities commission, and with road service and cars we feel the mines can run at 100 per cent capacity, and if the public will grant the necessary reduction in freight for which the dealers are asking, we will give the people coal a dollar cheaper, and we propose to do it," says Manager Worley.

Low Rates For Summer.

"We are installing a plant that will cost us nearly two hundred thousand dollars when the shipping facilities are put on. Salt Lake City must not be made to suffer another fuel famine like the present one. The cost of the plant will be more than taken care of in increased speed in handling our product and giving our mines an outlet for their output during the summer."

"As it is at present we are helpless. We are at the mercy of the railroads. During the next summer we will store enough coal that we will not be caught helpless like this, and we are going, also, to establish two rates, one

for summer months which will be a reduction of the winter months prices in an endeavor to have the public co-operate with us in preventing the possibility of another such calamity as is now on us."

INDIAN LANDS OPEN

Reservation Tracts in the Uintah Basin Are Placed On Sale.

Notification is received by The Hon. Albert H. Kneale, superintendent of the Uintah and Ouray Indian reservation, that Indian lands under federal jurisdiction are for sale in the Uintah Basin for fifteen dollars an acre.

Superintendent Kneale points out that in the establishment of the overhead irrigation system the government expended money at the rate of \$12.50 an acre on the lands that are for sale, with the result that the land virtually will cost only \$2.50 an acre. The terms in the purchase of the lands on a forty-acre basis are \$150 down, \$150 during the first year, \$150 during the second year and \$150 during the third year.

Whoever may be governor of the state of Utah ninety-eight years from now is sure of at least one distinction. Governor Hamberger's office has received an invitation for the chief executive a century from now to be present at a century dinner in September, 1913, when a box of important documents, known as the Glen Elder box, will be opened. The invitation is framed, and states that his excellency of Utah will meet there the president of the United States, members of congress and the state governors of Massachusetts. Governor Hamberger has said that he will have the invitation duly hung in his office, with permanent instructions that it be kept clean enough to be read even a century from now.

Approximately 16,390 acres of donated lands within the national forests were reforested in the forest year 1916. The total number of trees planted was 8,148,617, while 8280 pounds of live seed were sown.

GREEK CHRISTMAS OBSERVED AT PRICE CHURCH ON SUNDAY LAST

GREEK ORTHODOX CHURCH AT PRICE.

Beginning with high mass at 9 o'clock Sunday morning, January 7th, the Greek people of Carbon and Emery counties celebrated their Christmas in the Greek Orthodox church at Price, Rev. Mark Emm. Petrakis, pastor of the church, officiating.

The beautiful new edifice was appropriately decorated with numerous lighted wax tapers, which is the Greek style of decoration, and the services were attended by several hundred people locally and from the various camps.

Regarding the Christmas day it is well to know that the orthodox population of Europe follow what is known as the Gregorian calendar, which is thirteen days behind the Julian calendar or our method of computing time, hence the Greek Christmas day falls thirteen days later than ours.

The significance of the day is the same to the Greeks as to the rest of the Christian world, but they differ from us, in that their Santa Claus does not distribute gifts on Christmas day, but on the New Year's day instead.

CHECKS ARE REFUSED

Secretary of State Not Accepting Them
For Auto Licenses.

Floods of personal checks are being received at the office of the secretary of state daily in payment of automobile license fees. In conformity with an order issued last October they are returned without exception, although the greater number are known to be good.

"Discrimination cannot be practiced," says Harden Benson, secretary of state, "and I am compelled to send back all personal checks. Last year several men purchased auto tags with spurious checks and the law fell on the secretary of state."

Federal officers, express of fines and most states have adopted the policy of rejecting payments unless made in cash or in the form of postoffice or express money order.

The number of fires expressed on national forest lands during the calendar year 1916 was 6224, as against 1018 in 1915, and an average annual number of 4728 during the past five years, says Henry K. Graves, chief of the forest service, in his annual report just published. While more than the average number of fires occurred the number of acres burned over was but 452,436 acres, or 20 per cent less than the average per year for the period 1911-1915, inclusive. The average loss per fire was \$69.41. Forty-four per cent of the fires were confined to areas of less than one-quarter of an acre.

RAD HABITS.

Those who breakfast at a o'clock or later, lunch at 12 and have dinner at 6 are almost certain to be troubled with indigestion. They do not allow time for one meal to digest before taking another. Not less than five hours should elapse between meals. If you are troubled with indigestion correct your habits and take Chamberlain's Tablets, and you may reasonably hope for a quick recovery. These tablets strengthen the stomach and enable it to perform its functions naturally. Obtainable everywhere.—Adv.

HUNDRED DOLLAR ORE

Pelona Soon to Begin Shipments to the smelters at Zion.

M. P. Druffel, president and managing director of the Pelona in Emery county, was out last Saturday for the first time after an absence from his office of ten days or more of illness, during which time he was confined to his bed. President Druffel is in receipt of a letter from Superintendent Graft, telling of excellent conditions and particularly in the mine on the six hundred-foot level.

Samples from the ore exposed there gave returns of 48 per cent lead and thirty-six ounces of silver to the ton. This is close to hundred dollar ore. Samples of ore from the seven hundred level show a streak running up to near two hundred dollars a ton.

President Druffel says that arrangements will be made to begin shipping some of the ore. The weather has been very cold, twenty below zero at times, and blizzardy. As soon, however, as it moderates the ore is the mine and broken in the workings will be sent to the Salt Lake City market.
